

The WASTAC Seminar aims to promote the multidisciplinary application of remotely sensed data.

Through this seminar WASTAC hopes to broaden public awareness of available data sets and current applications.

The seminar has an emphasis on student involvement, but will also prove informative for anyone with an interest in remote sensing.

'Sell Your Vision'

The WASTAC Seminar aims to promote student involvement in the application of remotely sensed data.

If you have an idea for a research project and you would like to incorporate remotely sensed data into it, put together 1 powerpoint slide describing your project idea and present it on the day in 2 minutes for a chance to win a \$200 book voucher.

The 'Sell Your Vision' session for these presentations will be held prior to the lunch break. The most innovative and original idea as judged by a panel of WASTAC representatives will be awarded the WASTAC Seminar Prize following lunch.

To provide the organizers with an estimate of numbers please register your interest and whether you would like to make a 'Sell Your Vision Presentation' through the program co-ordinator.
